DETAILED ACTION

Claim Objections

The modifications to the claims were received on 08/28/2009. These modifications are accepted by the Examiner.

In view of the amendment filed on 08/28/2009, the Examiner withdraws claims objections to claims 1, 3-8 and 10-16 of the previous Office action.

Claim Rejections - 35 USC § 101

The modifications to the claims were received on 08/28/2009. These modifications are accepted by the Examiner.

In view of the amendment filed on 08/28/2009, the Examiner withdraws claim rejections under 35 USC § 101 to claims 1, 3-7 and 15-16 of the previous Office action.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Cameron on 09/02/2009.

The application has been amended as follows:

- a) The recitation in line 14 of claim 1 "said TCP verification" is changed to
"said verifying the transmitted TPC command"

- b) The recitation in line 4 of claim 8 "air interface" is changed to "air interface and comprising pilot and data symbols"
- c) The recitation in line 6 of claim 8 "verification means" is changed to "verification means included in the first unit"
- d) The recitation in line 9 of claim 8 "said TPC command" is changed to "a TPC command"
- e) The recitation in line 11 of claim 8 "said output of said TPC verification unit" is changed to "said output signal of said TPC verification means"

Allowable Subject Matter

Claims 1, 3-8 and 10-16 (renumbered 1-14) are allowed.

The following is an examiner's statement of reasons for allowance: claims 1, 3-8 and 10-16 (renumbered 1-14) are allowed because a comprehensive search of prior art failed to teach, either alone or in combination, in a Wideband Code Division Multiple Access (WCDMA) wireless communication system for estimating a signal to interference ratio (SIR) of a signal transmitted from a first unit to a remotely located second unit in said WCDMA wireless communication system, said signal being transmitted through an air interface, and comprising pilot and data symbols, the method comprising verifying, in the first unit, a transmitted Transmit Power Control (TPC) command, by determining, in the first unit, when said TPC command has been correctly received, and weighting, by the first unit, said pilot and data symbols wherein said weighting comprises taking into account a power change in said data symbols due to a

prior TPC charge; and giving by the first unit, a SIR estimation depending on the result of said TPC verification, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
